

PostQuam kozmetika opisana na ovoj stranici služi za uklanjanje prištića i poboljšanje problematične kože kod korisnika oba spola. Kod korisnika, koji su kod korištenja slijedili upute koje se nalaze na web stranici i na embalaži proizvoda, prosječno iskustvo su uklonjeni prištići i akne te bolja kvaliteta kože na licu i vratu.

Rezultati predstavljeni na web stranici nisu garancija za uspjeh. Unatoč činjenici da je većina korisnika zadovoljna rezultatima, postoje i kupci koji ne postignu željeni rezultat.

Veliki postotak korisnika izvješćuje nas o izvanrednim rezultatima. Međutim, ne postoji jamstvo za to i iste rezultate ne možemo garantirati svim kupcima.

Izjave od zadovoljnih korisnika napisane su na temelju mišljenja kupaca, koji nam ih pošalju putem emaila na info@xcorpovecanje.com ili koja se nalaze javno objavljena na internetu. Izvornici e-mailova se čuvaju na sjedištu tvrtke. Kupci imaju pravo zatražiti anonimnu objavu – u tom slučaju njihovo mišljenje objavimo s izmišljenim imenom i adresom.

PQE01970 GEL ANTIACNE 50ML

Description

Immediate-action liposome gel that regulates sebaceous secretion and gradually eliminates acne. It fights aesthetic problems and prevents the possible passage of physiological seborrhea to pathological conditions of greater importance. Suitable for skins with excess fat in all its grades.

Instructions for use

Apply locally at night.

In oily or acne skins, we recommend to apply a complete treatment in a cabin. As a general rule, you can take the one explained later. The frequency of it will depend on the type of skin and the persistence of acne.

Application of the complete treatment for oily skin.

Clean and tone with Postquam Refresh Milk and Astringent Tonic Post-Quam.

a) Seborrhoeic or mixed skin without acne: we apply steam with ozone to facilitate the opening of the pores and the subsequent extraction of the comedones.

b) Acne skin: we apply steam, but together with the PostQuam Exfoliating Peel, to prevent acne from spreading. We avoid movement.

To facilitate the extraction of comedones, we will use the PostQuam Balancing Cream, which, thanks to the sulfur-containing liposomes it contains, absorbs outward the fatty elements of the skin, facilitating the extraction of fats without causing traumas in the skin.

Active ingredients - * Sulfur Liposomes: they stop the excessive production of the sebaceous glands, acting as moderators of the sebum in the skin. It facilitates the transport and penetration of sulfur aminoacids.

- Biosulfur (sulfur in soluble form): Derivative of hydrophilic acid, which acts on the hyperactivity of the sebaceous gland, with keratolytic action (healing), keratoplastic (smoothing the skin), vasoconstrictor (closes the dilatation of the capillary vessels, thus braking the spread of acne) and antiparasitic.

- Cytobiol ulmaire alga: Astringent, absorbs excess sebum.

- Alcohol: Dry the skin avoiding infections.

- Glycerin: Moisturizing agent.
